EVROPSKÁ UNIE
EVROPSKÝ FOND PRO REGIONÁLNÍ ROZVOJ
ŠANCE PRO VÁŠ ROZVOJ

The preparation and printing of the classification characteristics has been financed via the Integration Operating Program co-financed from the structural funds of the European Union and the state budget of the Czech Republic

The rules and realisation of the categorisation:

- 1) The categorisation is valid from 1.1.2012
- 2) The categorisation remains valid for 5 years from the date of issue of the certificate.
- 3) The applications for categorisation are received by the Camp Association of the Czech Republic. Interested parties can find the necessary form on-line at www.camp.cz/akcr
- 4) The categorisation is realised free of charge for members of the Association within the framework of their membership fees, non-members pay the categorisation fee approved by the Association.
- 5) The categorisation is realised by commissioners who have been trained and who come from the ranks of the operators (the Camp Association of the Czech Republic - AKČR) and the users (the Federation of Camping and Caravanning of the Czech Republic) – hereafter simply referred to as the commissioners.
- 6) The categorisation is realised by the commissioners in person in the presence of the operator of the accommodation facility according to the published printed forms.
- 7) A record is kept of the realised categorisation and confirmation of the realisation of the categorisation is issued. The records and the filled-in forms are subsequently submitted to the Secretariat of the Camp Association of the Czech Republic.
- 8) The Secretariat allocates the number of stars and subsequently issues the certificate and the table with the inclusion in the appropriate category upon the basis of the evaluation of the record.
- 9) The operator may appeal against the results of the categorisation to the arbitration committee within 15 days of receiving the certificate from the evaluating committee.
- 10) The arbitration committee has three members and it consists of two trained representatives of the Camp Association of the Czech Republic (AKČR) and one representative of the Federation of Camping and Caravanning of the Czech Republic. The resulting statement will be issued within 30 days of the receipt of the appeal.
- 11) The commissioners will carry out random inspections throughout the validity of the allocated categorisation in order to check that the conditions conform to the given categorisation.
- 12) It is possible for the allocated categorisation to be changed during the course of its validity:
 - a) in the case of a change in the technical facilities at the camp site upon the basis of a request from the camp operator.
 - b) upon the basis of any ascertained differences in comparison with the allocated categorisation during the realisation of an inspection
- 13) The results of the allocated categorisation (the logo and the certificate) may be used without limitation in the published promotional and study materials of the given accommodation facility. An example of the official logo is included on the title page of this implementing regulation or jointly with the other information on the website at www.camp.cz/kategorizace

The categorisation has been prepared by a committee created by the Camp Association of the Czech Republic under the leadership of Mr Pavel Hess in 2011.

The categorisation of the camp and cabin sites in the Czech republic - the implementing regulation

	evaluation:	share (a)	selection (b)	max. (c)	compulsory min. number (d)			
					2	3	4	5

5.	Wellness may also be located in the direct vicinity - at the edge of the camp site, if it can be checked							
	a gymnasium				1,0			
	a solarium				1,0			
	massages				1,0			
	a whirlpool				1,0			
	a sauna				1,0			
	every further type of wellness (1 point)				1,0			
					1,0			
					1,0			
					1,0			
					1,0			
					1,0			
	Wellness: total (max. number of sub-points: 10)				10,0			
5.	Wellness: total (max. number: 6)	15			6,0			

6.	Other sports equipment	this may be located in the direct vicinity at the edge of the camp site						
	Tennis courts				3,0			
	Multi-purpose courts				2,0			
	Mini-golf				2,0			
	Table tennis				2,0			
	Beach volleyball				2,0			
	Trampoline				2,0			
	Bowling				2,0			
	Squash				2,0			
	Football ground				2,0			
	Every other sport not mentioned above (1 point)				1,0			
					1,0			
					1,0			
					1,0			
					1,0			
					1,0			
					1,0			
6.	Other sports facilities (max. number of sub-points 25)				25,0			
	actual number of points (max. number achieved during 12)	30			12,0			
SWIMMING, SPORT AND ACTIVITIES: total					10,0			

SWIMMING, SPORT AND ACTIVITIES: total					10,0	1,5	4,5	7
--	--	--	--	--	-------------	------------	------------	----------

	evaluation:	share (a)	selecti on (b)	max. (c)	compulsory min. number (d)			
					2	3	4	5

4.	Play equipment							
	Common room	(equipped with games, a theatre, activities a readers' corner)						
		The variant where the room is divided by means of a permanent or moving partition is also possible. Part of the bar or the restaurant separated by a curtain is not considered to constitute a common room.						
	Realisation / maintenance	the equipment is in good condition (paintings, walls, floors)			2,0			
		the room is nicely maintained and clean, especially the room for small children			1,0			
		the room's area corresponds to the number of guests at the camp site			2,0			
		the room is functionally equipped			2,0			
					7,0			
	Children's playground For <12	There are at least 5 different types of play equipment available, either in one central place or spread throughout the facility. In the case of multifunctional play equipment, each separate play option is counted. There are central and non-central playgrounds available. The central playground is also suitable as a meeting place. It is a plus for small children, if the playgrounds are not located centrally. The location is of less importance in small camp sites						
	Realisation / maintenance	the diversity of the play equipment			4,0			
		games which expand children's imaginations have preference						
		the size of the playground			4,0			
		the quality of the materials: stability, paintwork, a non-rusting structure, without any sharp edges and splinters			4,0			
		an absorbent base zone - sand, grass, rubber sheet			2,0			
		seating for the parents in attendance			2,0			
	Covered playgrounds	the play area is partially or completely covered			4,0			
					10,0			
	Adventure Playgrounds	(open or covered) playgrounds with adventure equipment (a climbing wall, a flying fox, a rope ladder...)						
	Realisation / maintenance	the quality of the materials: stability, paintwork, a non-rusting structure, without any sharp edges and splinters			1,0			
		the options, size, multifunction options			1,0			
		an absorbent base zone - sand, grass, rubber sheet			1,0			
	Water play Grounds	Play equipment in water or near water with sand on the ground or sports equipment in a shallow pool. The children must have sufficient room around them in a water playground (a minimum area of 100 m2).			1,0			
					4,0			
	Activity programs for children	at least 3x a week, in the main season			9,0			
					9,0			
	Activity programs for adults	excursions, trips, sports events			5,0			
					5,0			
4.	Play equipment: total		17,5		7,0			

A summary of the categories of camp and cabin sites in the Czech Republic validity 5 years

*	The facility must meet the minimum requirements for the operation of an accommodation facility – have secured easy access, a drinking water source, basic sanitary amenities and municipal refuse removal. The facility must provide a reception service and the regular cleaning of the facility, especially the sanitary amenities, must be secured.	
**	The average from the overall evaluation (the Facility, the Camp Accommodation Sites or the Cabins-Permanent Beds and the Sanitary Amenities) must result in at least the following number of points:	3
	The facility must meet the minimum requirements for the operation of an accommodation facility - have secured easy access, a drinking water source, basic sanitary amenities and municipal refuse removal. The facility must provide a reception service and the regular cleaning of the facility, especially the sanitary amenities, must be secured.	
	The average from the overall evaluation (the Facility, the Camp Accommodation Sites or the Cabins-Permanent Beds and the Sanitary Amenities) must result in at least the following number of points:	5
	The average from the evaluation (Swimming, Sport, Activities) must result in at least the following number of points:	1,5
***	the camping and cabin site must also fulfil the following/the facility must include:	
	... the sale of basic foodstuffs, especially breadstuffs every morning	
	... hot water in the showers and at all of the washbasins (with the exception of the service washbasin at the toilet) at least 6 hours a day	
	... sanitary amenities for handicapped people	
	... a kitchenette with the minimum equipment for guests	
	The average from the overall evaluation (the Facility, the Camp Accommodation Sites or the Cabins-Permanent Beds and the Sanitary Amenities) must result in at least the following number of points:	7
	The average from the evaluation (Swimming, Sport, Activities) must result in at least the following number of points:	4,5
****	the camping and cabin site must also compulsorily fulfil the following/the facility must include:	
	...camp security – the entire facility is fenced or secured with a physical guard service in the main season, possibly a camera system throughout most of the facility	
	... the option of internet use – an internet point or partial WiFi coverage	
	... the option of placing valuables into safekeeping at reception	
	... catering within the facility – at least refreshments	
	... the sale of a sufficient range of foodstuffs	
	... hot water in the showers and at all of the washbasins (with the exception of the service washbasin at the toilet), non-stop	
	... sanitary amenities for handicapped people	
	... a kitchenette with the minimum equipment for guests	

****	the camping and cabin site must also fulfil the following/the facility must include:	
	... the tourist sites must be clearly separated/demarcated – at least 20%	
	... hygiene cabins (lockable rooms with a washbasin)	
	... a changing table for babies	
	... a basin in the chemical toilets	
	... the option of hand washing clothes	
	... a laundry room (a washing machine, a drier)	
	... secured service parking for accommodated vehicles	
*****	the average from the overall evaluation (the Facility, the Camp Accommodation Sites or the Cabins-Permanent Beds and the Sanitary Amenities) must result in at least the following number of points:	9
	the average from the evaluation (Swimming, Sport, Activities) must result in at least the following number of points:	7
	the camping and cabin site must also fulfil the following/the facility must include:	
	... the option of paying using a payment card	
	...camp security – the entire facility is fenced and secured with a physical guard service in the main season or a camera system throughout most of the facility or a physical guard service during all opening hours	
	... the option of internet use – an internet point and partial WiFi coverage or WiFi with complete signal coverage of the accommodation areas	
	... the option of placing valuables into safekeeping at reception – safe deposit boxes	
	... catering within the facility – a restaurant	
	... an independent shop with foodstuffs in the facility	
	... hot water in the showers and at all of the washbasins (with the exception of the service washbasin at the toilet), non-stop	
	... sanitary amenities for handicapped people	
	... a fully equipped kitchenette for guests	
	the camping and cabin site must also fulfil the following/the facility must include:	
	... the tourist sites must be clearly separated/demarcated, at least 50%	
	... the number of comfort sites for tents and caravans, at least 10%	
	... hygiene cabins (lockable rooms with a washbasin) – more than 20% of the total number of washbasins	
	... a baby room	
	... sanitary amenities adapted for children	
	... separate sanitary amenities at some tourist accommodation areas	
	... a chemical toilet drain	
	... the option of hand washing clothes	
	... a laundry room (a washing machine, a drier, the option of ironing)	
	... paved service parking for mobile homes

	evaluation:	share (a)	selection (b)	max. (c)	compulsory min. number (d)			
					2	3	4	5

E) SWIMMING, SPORT AND ACTIVITIES

1. Swimming (Water quality is not evaluated)

A. Open-air swimming pools

The following only applies to swimming pools, not to natural outdoor swimming areas. Temporary, mobile surface-based swimming pools will not be evaluated. Any indoor or outdoor swimming pools must be located directly within the facility and designated for the camp site guests

Realisation / maintenance	the quality of the used materials and the finish in the swimming pool (tiles, stainless steel, plastic, plastic film, cemented and painted, surface finishes)			2,0
	the condition of the maintenance of the specific sanitary measures, the paintwork, plastic and tiles, entertainment facilities in the water...			2,0
	imaginatively created and varied forms			2,0
	entertainment facilities in the water, slides, whirlpools, ...			2,0
	the presence of showers, toilets, changing cabins, a sunbathing terrace or seating on deck chairs, small baths for cleaning the feet			3,0
	heated water in the swimming pool			3,0
The maintenance of the area around the swimming pool	The inspector will evaluate the impression, the fencing and the separation (not with barbed wire).			3,0
	the planting of greenery, benches, paintwork			7,0

B. Indoor swimming pools

The following only applies to swimming pools, not to natural outdoor swimming areas. Temporary, mobile surface-based swimming pools will not be evaluated. Any indoor or outdoor swimming pools must be located directly within the facility and designated for the camp site guests

	Swimming pools with permanent roofs or retractable roofs			4,0
	the quality of the used materials and the finish in the swimming pool (tiles, stainless steel, plastic, plastic film, cemented and painted, surface finishes)			2,0
	the condition of the maintenance of the specific sanitary measures, the paintwork, plastic and tiles, entertainment facilities in the water...			2,0
	the environment and facilities in the entire building			4,0
	entertainment facilities in the water, slides, whirlpools, ...			4,0
	the presence of showers, toilets, changing cabins, terraces or seating on deck chairs			8,0

C.	Natural swimming areas	this is understood to mean a lake, fishpond or river			
	Facilities	boat and peddle-boat hire			2,0
		outside showers			2,0
		water slides, water trampolines...			4,0
		the cleanliness and condition of the beach, the overall impression			4,0
					6,0

1.	Swimming (outdoor, indoor swimming pool, natural swimming area): total achieved points			21,0
	credited points - a maximum number of 15 points	37,5		15,0

The categorisation of the camp and cabin sites in the Czech republic - the implementing regulation

	evaluation:	share (a)	selecti on (b)	max. (c)	compulsory min. number (d)			
					2	3	4	5

14. Service parking for mobile homes								
The quality of the realisation / maintenance	the facility includes a specially equipped area as service parking for mobile homes with at least a drinking water supply and a drain for wastewater			2,0				
	the service parking for mobile homes is clearly marked and there is a paved flat base which the mobile homes can drive onto			2,0				
	easy accessibility and simple entry and exit							
14. Service parking: total		2,2	4,0			2	4	

15.	Hygiene					
Cleaning	The inspector will evaluate the hygiene of the toilets, urinals, showers, washbasins and common areas. Ascertain by questioning the guests at the facility, if possible. Emphasis is placed on apparent soiling and the frequency and method of cleaning			5,0		
	the toilets and urinals - no calcium build-up on the porcelain, clean the toilet seat, walls, floor, dividing walls and doors					
	the showers - no dirt and build-up on the shower head, the floor and the transition between the floor and the walls. The soap holders and shelves are clean, as is the shower drain. There is no build-up/soiling on the walls, seats, ceilings and doors.					
	the washrooms - no dirt on the walls, floors, ceilings, mirrors and on the internal sides of the doors in the washing cabins. The sink and the drain are clean and without any build-up on the edges and the silicon seal is without any mould. The soap holders and the shelves are clean, the lighting is without any dust, soiling and insects					
	the common areas (doing laundry and washing the dishes, etc), the walls and the floors are clean, without any build-up behind the taps, the windows and doors are clean, the window sills are without any insects, the lighting is without any dust, soiling or insects					
	the private sanitary amenities - the inspector will ascertain whether the sanitary amenities were clean when the guests arrived by interviewing them					
15.	Hygiene: total				2,8	5,0
						12,0
	Sanitary amenities: total	the average from the individual sanitary amenities according to the sum of the toilets + showers + washbasins - the percentile representation			50,0	12,0

The facility + the average from the accommodation site / cabins and the average from the sanitary amenities				10,0	3,0	5	7	9
--	--	--	--	-------------	------------	----------	----------	----------

The categorisation of the camp and cabin sites in the Czech republic - the implementing regulation

	evaluation:	share (a)	selecti on (b)	max. (c)	compulsory min. number (d)			
					2	3	4	5

A) THE FACILITY								
The facility means the area inside the borders of the camp site. The only exception to this is the entrance to the camp site. Guests enter along an access road.								
1. The entrance								
The access road to the camp site	paved dustless			2,0				
	wide and spacious so that long vehicles can pass			2,0				
	sufficiently lit			2,0				
	a guarded entrance (a guard service, monitoring, a barrier)			3,0				
				9,0				
The preconditions for finding the camp site	signs on the approach roads			2,0				
	clear signs leading to the actual camp site			1,0				
				3,0				
The parking area for cars or caravans upon arrival	the parking area (the parking space capacity) is sufficiently large for the cars and caravans of the incoming guests			5,0				
	there are clear signs leading to the car park			1,0				
				6,0				
1. The entrance: total		2,8	6,0					

2. The reception								
The reception will be evaluated, if this involves a reception or a registration point								
Functional equipment	the reception is clearly marked, including a visible sign with the opening hours			3,0				
	the receipt of guests takes place inside (not outside at a window) a room specially equipped for this purpose			3,0				
	there is a map of the camp and a pricelist (hung on the wall or as a handout), there is information on the camp rules, first aid, dentists, etc.			4,0				
Functional equipment	there is local tourist information and tips for trips available, walking maps and postcards are on sale			4,0				
	there is a postal service and the option of leaving messages			2,0				
	the option of paying using a payment card			4,0				
				10,0				4
The appearance and maintenance of the interior	the maintenance of the unit (paintwork, the floor, furniture)			6,0				
				6,0				
2. The reception: total		3,7	8,0					

3. Hygiene - Automatic Flushing								
Tracks are often not necessary in very small camps. If the inspector considers this to be the case, the average evaluation will be used								
Amenities/ Maintenance	the type of carriageway conforms to the type of enterprise, for example a forest track in a forest camp site, but without uneven areas and potholes - the carriageways are reinforced, a dustless solid surface (asphalt is not a precondition)			2,0				
	the entrance and departure tracks are sufficiently wide for two-way traffic. This is not necessary, if they are marked as being one-way			2,0				
	secured passage for emergency situations (fire engines, ambulances), the corners are sufficiently wide, no branches blocking passage			2,0				
	the accommodation areas are easily accessible, the entrances to them are also sufficiently spacious for caravans/mobile homes			4,0				
				5,0				
3. Roads/tracks: total		2,3	5,0					

The categorisation of the camp and cabin sites in the Czech republic - the implementing regulation

	evaluation:	share (a)	selecti on (b)	max. (c)	compulsory min. number (d)			
					2	3	4	5

4. Direction signs/lighting					
The realisation and maintenance of the direction signs	the type and size depends on the size of the enterprise - the clarity of the direction signs, possibly supplemented with maps, is important - correct and simple navigation (the elimination of uncertainty). The equivalent is a map of the facility which every guest receives upon arrival				4,0
	the quality of the used materials and their maintenance, visibility				
	also suitable for children/foreigners (recognisable characters/symbols without the need to understand the text)				
Lighting	the buildings and main tracks are well lit				3,0
	the lighting is well distributed, the secondary tracks are equipped with orientational lighting				3,0
					5,0
4.	Direction signs/lighting: total		2,3		5,0

5. The maintenance of greenery								
The maintenance of greenery	the greenery is well maintained (the grass is mown, the trees are trimmed and any old branches have been removed)				3,0			
	the planting of greenery has achieved the pleasant natural division of the facility, the facility is well integrated into the surrounding terrain				2,0			
					5,0			
5. The maintenance of greenery: total		2,3			5,0			

6. The maintenance of order in the facility								
The collection and removal of rubbish	the separate collection of sorted waste (at least glass, paper, plastic, other/communal waste)				2,0			
	no overfilled large containers				1,0			
	the containers are suitably disguised (behind a wooden wall, greenery) - the containers are located in such a way so that they do not disturb the environs with smell or noise				1,0			
The material store	The highest evaluation will be achieved, if none of the stored material is visible - it is in a separate part				2,0			
					6,0			
Small scale waste	There is no rubbish (cans, papers, bottle tops, etc.) in the entire facility or at any of the set places				6,0			
					6,0			
6. The maintenance of order in the facility: total		2,8			6,0			

7.	Miscellaneous: total								
Camp security	a physical guard service - throughout all the opening hours		4						
	only in the main season		2						
	fencing around the entire facility			2					
	a camera system covering - only the exit		1						
	most of the facility		4						
		1,2	10,0			2	4		
The kitchenette - space for the guest to do their own cooking, cooking elements available	a freezer		1,0						
	a refrigerator		1,0						
	a sink with hot and cold water		1,0						
	the condition and functioning of the equipment		3,0						
		0.5	4.0		1	2	3		

The categorisation of the camp and cabin sites in the Czech republic - the implementing regulation

	evaluation:	share (a)	selecti on (b)	max. (c)	compulsory min. number (d)			
					2	3	4	5

11.	The option of doing laundry								
	The option of doing laundry	A place for doing laundry is considered to mean a stainless steel or ceramic sink at a working height with hot water (directly above the sink or in its direct vicinity)							
		the provision of lighting				1,0			
	Realisation / maintenance	sufficient bench space or possibly also shelves				1,0			
		the condition of the maintenance is important - the taps, tiles, walls, drainage baskets, floor, washboards and sinks				2,0			
11.	The option of doing laundry: total				2,2	4,0		2	3

12.	The laundry							
	The quality of the realisation / maintenance	An area with a washing machine, a drier and the possibility of doing ironing will be evaluated as a laundry						
		the option of an automatic washing machine					2,0	
		the option of a drier					1,0	
		the option of ironing					1,0	
		the overall technical conditions (the machines and the area)					2,0	
		good tiles / high quality artificial walls and floor						
12.	The laundry: total			3,3	6,0		4	5

13. The sanitary building (as a whole)								
Separate washbasins and toilets	they are separated - if the washbasins and the showers are not located in the same room as the toilets, they do not have to be separated - all the way to the roof, however 1 (emergency) toilet may be installed at min. 2.2 m in the washrooms						4,0	
Equipment / area	the buildings are functionally equipped						3,0	
	the doors open in the logical direction							
	equal lighting							
	an entry area with a cleaning zone						2,0	
	the good labelling of the parts of the sanitary facility (directions, pictograms)						2,0	
	built-in pipes / not visible						2,0	
The condition and maintenance of the exterior	the condition and functionality of the enclosure of the individual areas						2,0	
	good ventilation						2,0	
	The inspector will evaluate the immediate environs							
	the good condition and maintenance of the wooden structures, paintwork, the glass in the glazed areas (clean),							
	exterior lighting							
	greenery and access paths							
The overall Impression	The inspector will evaluate the external impression of the sanitary amenities. Especially the architecture,							
	the appearance, flowers and plants, cosiness, the harmony with the environs, The functionality							
13. The sanitary building (as a whole): total		2,8			5,0			

The categorisation of the camp and cabin sites in the Czech republic - the implementing regulation

	evaluation:	share (a)	selecti on (b)	max. (c)	compulsory min. number (d)			
					2	3	4	5

5.	The baby room: only either a changing table or a fully equipped baby room are evaluated							
	There is no separate room, just a changing table		1					
Baby room	a baby room is considered to be a room with sufficient space which includes:							
	a bath for bathing a baby							
	a hot water source							
	a rubbish bin							
	space for changing the baby							
Realisation	pipes in the wall, not freely visible		1					
	tiles / high quality plastic to a height of at least 180 cm		1					
Maintenance (technical)	the condition of the floors, the ceilings, the doors, the bath, the shower and the changing area		2					
5.	The baby room: total		2,2	4,0			1	3

6.	Sanitary amenities for children							
	Sanitary amenities for children	Sanitary amenities are considered to have been designated for children, if there is one child's toilet, a child's shower and a child's washbasin. Max evaluation, if all these amenities are included.		2,0				
	The creativity / resourcefulness of the realisation	ranging from interesting tiles through to, for example, Mickey Mouse fittings		1,0				
6.	Sanitary amenities for children: total		1,7	3,0				2

7.	Sanitary amenities for handicapped people							
Sanitary amenities for handicapped people	This is considered to involve a toilet, a washbasin and a shower with hot and cold water							
	there are no doorsills							
	the net width of the door is at least 90 cm							
	there is sufficient room to turn a wheelchair around							
	the toilet is raised and fitted with handles							
	the washbasin and mirror are at the level for a wheelchair							
	the shower is equipped with a seat							
The creativity / resourcefulness of the realisation	pipes in the wall, not freely visible				1,0			
	tiles / high quality plastic to a height of at least 180 cm				1,0			
	emergency signalling equipment				1,0			
	the quality and condition of the used materials - the fittings, the washbasins, the partition walls, the hooks, the finishing of the walls, floors and ceilings, the condition of the maintenance of the walls and floors, the mirrors, the soap dispensers, the sockets and the rubbish tins				3,0			
7.	Sanitary amenities for handicapped people: total		3,3	6,0		3	4	4

8.	Individual sanitary amenities							
	Individual sanitary amenities - a shower, washbasin and toilet							
	sanitary facilities directly on site for 2% and more sites		1					
	sanitary facilities directly on site for 5% and more sites		2					
	sanitary facilities directly on site for 10% and more sites		3					
8.	Individual sanitary amenities for the accommodation sites: total		1,7	3,0				1

The categorisation of the camp and cabin sites in the Czech republic - the implementing regulation

	evaluation:	share (a)	selecti on (b)	max. (c)	compulsory min. number (d)			
					2	3	4	5

	The internet	internet point				2,0		
	For guests	WiFi connection (partial, for example in the area around reception)			2			
		WiFi connection (complete: including coverage of the accommodation areas)			7			
				1,0	9,0		2	4
	The option of placing valuables into safekeeping	the option of placing valuable in safekeeping at reception			2			
		individual safe deposit boxes			4			
				0,5	4,0		2	4
	Telephone	a telephone available in the facility 24 hours a day - reception			2			
		a telephone available in the facility 24 hours a day - a phone box			5			
				0,6	5,0			
7.	Miscellaneous: total		3,7	8,0				

Catering, sales								
8.	Catering - in the facility	The quality of the facility's food is not evaluated by this categorisation, each catering building is only evaluated once						
	Restaurant	A restaurant is considered to be a pleasantly fitted out area where food is served on the basis of a menu, with service, where the menu at least contains starters, 5 main courses, deserts and a drinks list						
	Amenities/equipment/the restaurant atmosphere	the restaurant has its own toilets				2,0		
		this is involves a pleasant and harmonically fitted out room (furniture, decorations, lighting, table laying)				2,0		
		there is sufficient room between the tables for a high feeling of privacy, equipped with comfortable chairs and spacious tables				3,0		
	Condition/maintenance	the condition of the paintwork, furniture, floors...				3,0		
				2,31	10,0			
	Snack bar/refreshments	a snack bar can be considered to be a refreshment stand or a catering building which does not meet the conditions for a restaurant						
	Amenities	a room where customers wait for the food, the option of consuming the food on site				2,0		
		various drinks				1,0		
		light refreshments				1,0		
		a rubbish tin available				1,0		
	Condition/maintenance	the condition of the paintwork, furniture, floors...				3,0		
				0,93	4,0			
8.	Catering: total		Only the restaurant, then the restaurant*0.6, only refreshments, then the value of the refreshments, if both, then the arithmetic average of both			3,2	7,0	4 6

9.	Food/sales							
	Sales	the sale of a range of basic foodstuffs and hygiene products, breadstuffs				3,0		
		a sufficient product range				3,0		
		sales at an independent camp store				3,0		
	Condition / maintenance	the condition of the paintwork, furniture, floors...				3,0		
						4,0		
9.	Food/sales: total		1,9	4,0			1	2 3
A) THE FACILITY: TOTAL		25	6,0					

The categorisation of the camp and cabin sites in the Czech republic - the implementing regulation

	evaluation:	share (a)	selecti on (b)	max. (c)	compulsory min. number (d)				
					2	3	4	5	

B) The accommodation sites - camp									
1. The sites									
The number of comfort sites	a comfort site is considered to be a demarcated site equipped with: its own electrical connection, its own water connection or a shared water connection (1 tap for two sites and its own/independent wastewater drain (a sewer outlet which fits the drainage hose from a caravan/mobile home)								
	comfort sites account for more than 5% of all sites			2					
	comfort sites account for more than 10% of all sites			4					
	comfort sites account for more than 15% of all sites			6					
	comfort sites account for more than 25% of all sites			8					
			2,2		8,0				4
Separate / demarcated sites	the minimum number of tourist sites which are clearly separated by means of posts, numbers, stones, signs, trees or in any other way:								
	number 20%			2					
	number 50%			4					
	the separation is clear so that everybody can see how deep the sites are						1,0		
	the posts/signs are in good condition, easily legible						1,0		
			1,6		6,0			4	6

Average site size	the inspector will measure at least 4 sites at different locations in the facility. If the biggest or smallest site fully exceeds the average for the others, it does not have to be included in the evaluation								
	the sites designated only for hikers and the sites designated only for mobile homes are also not included in the average								
	in the case of sites with separate parking for the cars, an area of 15 m2 will be added to the area of the sites without car access								
	If the sites are adjacent to one another, 3 metres of width will be deducted for the passage of pedestrians and vehicles								
	if the sites are not actually separated, the entire area will be calculated from the number of sites and the total area designated for accommodation reduced by a 3 m wide track								
	site size 60 - 80 m2	1,1	4						
	site size 80 - 100 m2	2,2	8						
	site size 100 -120 m2	4,1	15						
	site size greater than 120 m2	6,6	24						
			6,6		24,0				
The realisation / accessibility of the sites	grass or another dust-free surface			1,0					
	the surface is flat, without terrain deformations			3,0					
	the sites are also easily accessible with a trailer, no branches in the way			2,0					
			1,6		6,0				
1. The sites: total			11,5		11,0				

The categorisation of the camp and cabin sites in the Czech republic - the implementing regulation

	evaluation:	share (a)	selecti on (b)	max. (c)	compulsory min. number (d)				
					2	3	4	5	

3. Showers									
The number of showers with hot water	the total number of showers with hot water. A family shower is only counted as one shower								
	1 shower per 20 sites			1					
	1 shower per 15 sites			3					
	1 shower per 10 sites			6					
			1,9		6,0				
Realisation, dimens	a shower with a lockable stall, a partition in the stall which prevents the removed clothing from getting wet								
Lighting	individual lighting or a long fluorescent tube which simultaneously lights two cabins. The lights must be in good condition and quality.								
							1,0		
Clothes hooks	at least two hooks per shower								
Seating	understood as being permanently installed								
							1,0		
Family showers - min. 1 per 40 sites	a family shower is considered to be a locakable area with at least two showers, sufficiently spacious for 2 people to shower at once								
			2,2		7,0				
Realisation	tiles / high quality plastic to a height of at least 180 cm								
	pipes in the walls, not visible on the surface								
							1,0		
Maintenance (technical)	- the quality of the used materials: the shower fittings, the dividing walls and the hooks, the finishing of the walls, floors and ceilings, the condition of the maintenance of the walls, floors and ceilings, the locking function								
							3,0		
			1,5		5,0				
3. Showers: total			5,6		10,0				

4. Washbasins									
The number of washbasins. Service basins are not included, but hygiene cabins are	1 washbasin per 15 sites								
	1 washbasin per 12 sites			3					
	1 washbasin per 8 sites			6					
			1,9		6,0				
Hygiene cabins (a closable and lockable room with a washbasin)	the number of hygiene cabins:								
	- a total of up to 20% of the total number of washbasins								
			0,3	1				1	
Sockets at the washbasins	- more than 20% of the total number of washbasins								
			0,6	2				2	
	- only at some washbasins								
				1					
The distance between taps	from 85 cm or if there is a partition between the washbasins								
							1,0		
Lighting	individual lighting or a long fluorescent tube which simultaneously lights two cabins. The lights must be in good condition and quality.								
							1,0		
Clothes hooks	at least one hook per washbasin								
							1,0		
			2,2		7,0				
Realisation	pipes in the wall, not freely visible								
	tiles / high quality plastic to a height of at least 150 cm								
							1,0		
Maintenance (technical)	- the quality and condition of the used materials - the fittings, washbasins, partition walls and hooks, the finishing of the walls, floors and ceilings, the condition of the maintenance of the walls and floors, mirrors, soap dispensers, sockets and rubbish bins								
							3,0		
			1,5		5,0				
4. Washbasins: total			5,6		10,0				

The categorisation of the camp and cabin sites in the Czech republic - the implementing regulation

	evaluation:	share (a)	selecti on (b)	max. (c)	compulsory min. number (d)			
					2	3	4	5

D) Sanitary amenities (the average from all of the sanitary buildings)								
the percentile representation of the individual sanitary amenities according to the number - toilet+shower+washbasin								100,0
1.	Hot water							
	Hot water available	non-stop in the showers and in all of the washbasins (excluding the service basin in the toilet)	5,6	10				
		at least 6 hours/day in the showers and at all the washbasins, except the service basin	2,8	5				
		at least 6 hours/day in the showers and at some of the washbasins	1,1	2				
1.	Hot water: total	5,6		10,0		5	10	10

2.	Toilets and urinals							
	The number of toilets (including urinals)	the total number of toilets, urinals and long-drop toilets - maximum evaluation: one toilet per ten sites - the number of tourist sites + seasonal sites + the number of other sites which are used. The sanitary amenities are divided by the number of toilets						
		1toilet for 20 sites		1				
		1 toilet for 15 sites		3				
		1 toilet for 8 sites		6				
			1,6		6,0			
	Dimensions	sufficient distance from the edge of the toilet bowl to the doors, in the case of laterally positioned toilets, the distance to the walls is min. 60 cm			1,0			
	Lighting	individual lighting or a long fluorescent tube which simultaneously lights two cabins. The lights must be in good condition and quality.			1,0			
	Toilet paper	located centrally, for example in the aisle		1				
		individually - placed in each cabin		3				
	Clothes hooks	at least one hook per toilet			1,0			
	Rubbish bin (the ladies' toilets)	one rubbish bin with a lid or a rubbish shaft with a flap in each lady's toilet			1,0			
	Service Washbasin	specialy for washing hands after the use of the toilet at a distance of less than 5 m. Any other method with a tap (for example, when washing dishes) - not considered to be a service basin			1,0			
			2,1		8,0			
	Realisation	tiles / high quality plastic to a height of at least 150 cm			1,0			
		pipes in the walls, not visible on the surface			1,0			
	Maintenance (technical)	the quality of the used materials in the toilet bowls, urinals, dividing walls and hooks, the finishing of the walls, the floor and the ceilings, the cistern, the condition of the maintenance of the walls, the floors, the ceilings, the toilet bowls, the urinals, the doors, the pipes, the functionality of the flush mechanisms and the locks			3,0			
			1,3		5,0			
	Hygiene - Automatic flushing	sensor/timed - only urinals		1				
		sensor/timed - urinals and toilets		2				
			0,5		2,0			
2.	Toilets and urinals: total	5,6		10,0				

The categorisation of the camp and cabin sites in the Czech republic - the implementing regulation

	evaluation:	share (a)	selecti on (b)	max. (c)	compulsory min. number (d)			
					2	3	4	5

2.	Electr. connections	This involves electrical connections at tourist sites						
	The total number	connections for 10% - 25 % of sites		1				
		connections for 25% - 50 % of sites	1,62	3				
		connections for 51% - 75% of sites	3,23	6				
		connections for 76% - 100% of sites	4,85	9				
			4,9		9,0			
	Realisation / maintenance	the maximum distance to an electrical box: 20 m			1,0			
		it is not necessary to extend a cable across the track			1,0			
		the electrical box can be closed (it does not have to be lockable)			1,0			
		the electrical box is located at least 50 cm above the ground and it is protected against the rain			1,0			
		the electrical box/post is in good visual and technical condition			1,0			
			4,9		5,0			
2.	Electrical connections: total	7,3		7,0				

3.	Water sources	This involves the option of drawing water for the tourist sites						
	Realisation / maintenance	the tap is located at a height of 45 cm or more from the ground which enables the easy drawing of water into a canister			1,0			
		the surface around the point with the tap has been reinforced			1,0			
		it includes a drain into the sewer for dirty water			2,0			
		the place for drawing water is in a good visual and technical condition	3,1		6,0			
	Distance	the evaluated maximum distance of the drinking water source from at least 80% of the accommodation sites						
		up to 100m	1,04	2				
		up to 50 m	2,08	4				
		up to 25m	3,13	6				
			3,1		6,0			
3.	Water sources: total	6,3		6,0				
					6,0			
ENTER !! The total percentile representation of the number of people in the accommodation sites (3.5 people per site) in comparison with permanent bed accommodation								100,0
B) Accommodation sites: total								25,0
								6,0

The categorisation of the camp and cabin sites in the Czech republic - the implementing regulation

	evaluation:	share (a)	selecti on (b)	max. (c)	compulsory min. number (d)			
					2	3	4	5

C) Cabins and other permanent accommodation in camps. The term "cabin" is also considered to include caravans, caravans for hire, mobile homes, rooms and so on								
ENTER !! The total percentile representation of individual types of cabins in the number of beds against the number accommodated on the sites								100,0
Exterior requirements for cabin amenities	cabin exterior lighting							1,0
	a place to sit outside the cabin, including amenities							2,0
	the outdoor seating is covered by a roof							1,0
	sufficient free space between the individual cabins							1,0
	parking at the cabin or in the vicinity of the cabin, reinforced and groomed access paths and tracks							2,0
	wheelchair access in at least one cabin							2,0
	the overall impression of the used materials and the tidiness of the cabin							3,0
	Exterior requirements: total				3,85			6,0

Interior cabin fittings	sufficient cabin lighting							1,0
	220V sockets							1,0
	permanent beds, at least 80x190 cm							1,0
	a night table or a shelf for each bed							2,0
	a table or work desk							1,0
	a chair or armchair corresponding to the number of beds							2,0
	a wardrobe, including shelves and coat hangers, sufficiently spacious							2,0
	bedding							1,0
	bed linen							1,0
	a rubbish bin							1,0
	a mirror							1,0
	curtains or other means of shading the windows							1,0
	a radio, possibly also only hired							3,0
	a TV - possibly also only hired							3,0
	the overall impression of the used materials and fittings							3,0
	Interiors: total				3,85			6,0

A kitchenette - this is only evaluated, if the cabin has one	a cooker + oven							2
	a refrigerator/freezer							1
	a microwave oven							1
	an electric kettle							1
	dishes for cooking							1
	glasses, pots, cutlery, plates, etc. (min. 1/bed)							1
	a dishwasher							2
	large emphasis of the overall impression of the used materials and equipment							3
	Kitchen: total				5,77			9,0
